

Andale Farmers Coop is pleased to announce the implementation of our new Mapping Program. If you as a farmer would like to track all expenses and income with each tract of land we are now able to do that. All we need from you is legal descriptions and a name for each business unit per tract of land you have with us. We feel this will help you, as our patron, to benefit from this with your record keeping. It should also help to eliminate errors at the scale when grain is delivered.

Every farmer already has a name for the ground that they farm. (Home Place, 35<sup>th</sup> Street, etc... for example) If we have this information with the legal we will be able to be more productive for you.

If you would like to benefit from this service or have questions, please call and get set up in our system as soon as possible!
